WORK EXPERIENCE

Freemotion Studio - Initiative Lead / Contract Game Programmer

Contract | Remote, United States | Mar 2026 - Present

- Lead technical initiatives for a confidential game project.
- Write RFC-style technical documents to define architecture direction, implementation scope, validation expectations, and follow-up decisions.
- Review GitHub issues, pull requests, and task deliverables to keep implementation aligned with approved initiative goals.
- Contributed hands-on programming during the early phase before shifting primarily into initiative leadership, review, and technical planning.

CV Maleo Media Kreatif - Programmer

Full-time | Remote, Indonesia | Jan 2024 - Present

- Developed Catmelon, a 2D casual game, handling core mechanics, ad integration, optimization, and QA support.
- Contributed to Ojol Life from early development through launch, supporting core systems that helped it reach a Top 3 Free Games ranking on Google Play.
- Worked with programmers and artists to refine gameplay flow, mobile performance, and release polish.

uniXcorp - Founder & Lead Programmer

Part-time / Self-employed | Remote, Indonesia | Jan 2019 - Mar 2026

- Led a small, award-winning indie team, overseeing game programming, design, and mechanics while earning national and international game development awards.
- Managed end-to-end development, from concept to release and post-launch updates.
- Created games recognized for technical innovation, storytelling, and audio design.
- Worked closely with programmers, artists, designers, and sound engineers to ensure high-quality gameplay.
- Successfully collaborated with other indie studios to release mobile games.

Impact Plus Technologies Pte Ltd - Programmer

Full-time | Remote, Singapore | Aug 2023 - Dec 2023

- Developed a Web3-based game, integrating events and interactive elements from stakeholders and companies into gameplay.
- Developed Augmented Reality (AR) games and apps based on stakeholder demands, enhancing engagement and interactivity.
- Created casual mobile games for Android and iOS, including Swoosh Ball, Jump and Boom, and Puzzling Polygons.
- Focused on gameplay mechanics, optimization, and cross-platform compatibility.

Web3re Technologies Pte Ltd - Programmer

Full-time | Remote, Singapore | Apr 2023 - Aug 2023

- Helped design a Web3-based virtual world game, focusing on core mechanics like pedestrians, traffic, and NPC systems to create a dynamic environment.
- Collaborated with artists to integrate assets smoothly into the game.
- Developed multiplayer synchronization using Photon for seamless real-time interactions.
- Optimized performance and resolved technical issues to enhance gameplay across stakeholder devices.

Indigo Game Startup Incubation - Project Manager & Programmer

Full-time | Bandung, Indonesia | Jul 2022 - Dec 2022

- Managed the development of Heisters, a 3D top-down shooting game, and successfully delivered it within 6 months.
- Led a small game development team, ensuring each member completed their tasks and collaborated effectively.
- Worked hands-on as a game programmer to support the technical development and smooth gameplay experience.
- Coordinated closely with designers and artists to shape creative ideas and bring them to life.
- Improved leadership and team management skills while balancing both managerial and technical responsibilities.
